date of this Petition, applicant is submitting an Amendment requesting the claim of priority be entered in the specification of the application. A petition for a one month extension of time is included in with that Amendment. Applicant has attached a copy of that Amendment and the petition for one month extension of time hereto and asks that the Amendment be entered.

Applicant also states the entire delay between the date the priority claim was due and the date the claim was filed was unintentional.

The Commissioner is authorized to withdraw \$1,280.00, as identified in 37 C.F.R. § 1.17(t), from Deposit Account No. 12-0600 for this Petition fee. In the event that the foregoing request or fee calculation are incorrect, this Petition should be construed as one for sufficient time to permit the timely filing of the present reply. The Commissioner is authorized to charge any additional fee that may be required, or credit any overpayment, to Deposit Account No. 12-0600.

It is respectfully requested that this Petition be granted.

--Cross Reference to Related Applications

AI  
This application claims benefit of priority to U.S. Application Serial No. 60/189,160, filed March 14, 2000, and entitled In Home/Office Tornado Alert System, which is incorporated herein by reference.--

Remarks

The Examiner rejected the present application as being unpatentable over U.S. Patent No. 6,295,001, issued to Barber (the "Barber patent"). On the face of the Barber patent, the Barber patent has an identified filing date of August 21, 2000 (the "Barber patent filing date"), and an issue date of September 25, 2001.

Applicant submits herewith an Affidavit under 37 CFR §1.131 stating that Applicant conceived of, and reduced, the invention hereof prior to the Barber patent filing date, and that Applicant practiced due diligence from the time of the date of invention to the time the present patent application was filed. Additionally, Applicant has filed separately, although on the same date as this Amendment, a Petition to Accept an Unintentionally Delayed Claim of Priority. The claim has been made to claim priority for the present application to U.S. Application Serial No. 60/189,160, filed March 14, 2000, and entitled In Home/Office Tornado Alert System. A copy of that Petition is included as Exhibit D to the Affidavit filed herewith.

Since Applicant has sworn behind the Barber patent, Applicant requests that the rejection based on that reference be removed. No other rejections are pending. Therefore, Applicant requests that a Notice of Allowance be issued.

No new matter has been added. Thus, no new review is required, and no new search is required.

The references cited by the Examiner and made of record have been reviewed by Applicant. Applicant has no further remarks with regard thereto.

Based on the foregoing, it is submitted that the Applicant's invention as defined by the claims is patentable over the references of record. Issuance of a Notice of Allowance is solicited.

Applicant's attorney welcomes the opportunity to discuss the case with the Examiner in the event that there are any questions or comments regarding this response or the application.

Respectfully Submitted,

This application claims benefit of priority to U.S. Application Serial No. 60/189,160, filed March 14, 2000, and entitled In Home/Office Tornado Alert System, which is incorporated herein by reference.--

JMS/1026888

AFFIDAVIT UNDER 37 C.F.R. § 1.131

I, Andre P. Guillory, state as follows.

-1. I am the inventor of U.S. Patent Application Serial No. 09/804,772, filed March 13, 2001, entitled System for Selective Notification of Severe Weather Events, (the "'772 patent application").

2. The '772 patent application was rejected as being unpatentable over U.S. Patent No. 6,295,001, issued to Barber (the "Barber patent"). On the face of the Barber patent, the Barber patent has an identified filing date of August 21, 2000 (the "Barber patent filing date"), and an issue date of September 25, 2001.

3. My invention, as identified in the '772 patent application, was conceived and reduced to practice prior to the Barber patent filing date. I practiced due diligence between the time of my date of invention to the time the '772 patent application was filed. The following paragraphs provide support thereof.

4. On March 14, 2000, I filed a provisional patent application assigned U.S. Patent Application Serial No. 60/189,160, entitled In Home/Office Tornado Alert System (the "'160 patent application"), a copy of which is attached hereto as Exhibit A and incorporated herein by reference.

5. Attached hereto as Exhibit B, and incorporated herein by reference, is the filing receipt for the '160 patent application.

6. Attached hereto as Exhibit C, and incorporated herein by reference, is a copy of a patent search I completed with the U.S. Patent & Trademark Office. The sales slip for this search is dated February 10, 2000.

7. Further, I will file (through my attorney), on the date concurrent herewith, a petition for acceptance of an unintentionally delayed claim for priority to the '160 patent application. A copy of that petition is attached hereto as Exhibit D, and incorporated herein by reference. Further, an amendment requesting that the specification of the '772 patent application be amended to include the delayed claim for priority is filed concurrently herewith.

EXECUTED this 25 day of February, 2002.

  
Andre P. Guillory

STATE OF Kansas )  
COUNTY OF Sedgwick ) ss.

On this 25<sup>TH</sup> day of February, 2002, before me personally appeared Andre P. Guillory, to me known to be the person described in, and who executed the foregoing instrument, and he duly acknowledged to me that he executed the same for the uses and purposes therein set forth.

Title: INHOME/OFFICE TORNADO ALERT SYSTEM

As a below named inventor, I hereby state that I qualify as an independent inventor as defined in 37 CFR 1.9(c) for purposes of paying reduced fees to the Patent and Trademark Office described in:

- ☒ the specification filed herewith with title as listed above.  
☒ the application identified above.  
☐ the patent identified above.

I have not assigned, granted, conveyed, or licensed, and am under no obligation under contract or law to assign, grant, convey, or license, any rights in the invention to any person who would not qualify as an independent inventor under 37 CFR 1.9(c) if that person had made the invention, or to any concern which would not qualify as a small business concern under 37 CFR 1.9(d) or a nonprofit organization under 37 CFR 1.9(e)

Each person, concern, or organization to which I have assigned, granted, conveyed, or licensed or am under an obligation under contract or law to assign, grant, convey, or license any rights in the invention is listed below:

- ☒ No such person, concern, or organization exists.  
☐ Each such person, concern, or organization is listed below

Separate statements are required from each named person, concern, or organization having rights to the invention stating their status as small entities. (37 CFR 1.27)

I acknowledge the duty to file, in this application or patent, notification of any change in status resulting in loss of entitlement to small entity status prior to paying, or at the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity is no longer appropriate. ## IN HOME / OFFICE TORNADO ALERT SYSTEM

This invention relates to In home/office tornado alert system. More specifically it relates to a tornado alert system which will alert homeowners/ office personnel of Tornado activity / sightings at the same time as the Civil Defense Police Departments sound current siren alerts.

Tornados are the worlds most destructive and active weather related danger. They have caused extensive damage to property and person even taken lives. If you can notify people at all times , day or night , while at home sleeping or awake, you can give them just a few more precious minutes or even seconds, to seek shelter in the home or nearby shelters.

Various Tornado warning systems have been developed for detecting Tornados, I don't propose to make any attempt develop these any further, rather to improve the ability to alert person in the path of Tornados, to give them as much time to seek shelter from these Masters of Destruction.

### SUMMARY OF THE INVENTION

It is the primary objective of this invention, to improve the current Tornado Alert Systems, by improving our ability to alert persons. Day or Night, at home as well as in the office/ business.

The technology for the alert system will allow a reliable alert system with message and alert tone capability.

The power source for the system will be provided by AC 120 V. or DC/AA battery backup.

The signal for the In Home/ Office System will be received by a built in high frequency radio receiver, which will pickup specific signals transmitted by the control unit at current siren capability as well as rural locations.

Each receiver will be programmed with a location address - numerical in nature. This address will allow specific receivers to be placed in homes and businesses in the same area to receive the alert messages and tones from their respective transmitting controllers. The receivers will all operate on the same frequency, but addresses all the receivers to disregard messages from overlapping controllers signals.

The receiver will have a microprocessor to provide the capability of tones ,messages, signals ,alert for low battery ,AC power failures etc.... It will also have the ability to do self checks and testing of its internal functions.

I have prepared a drawing of a community with present day siren alert towers, coverage and the coverage using the IN HOME/OFFICE TORNADO ALERT SYSTEM. Also I have attached a simple drawing of the in home unit and the controller.

## DESCRIPTION OF INVENTION

To the best of your ability, describe in your own words how your invention works. Attach any sketches, photographs or other written descriptive materials. REMEMBER, the better you describe your idea the more thorough research we can do for you.

NAME OF INVENTION OR TRADEMARK: TORNADO Alert System  
IN Home/office TORNADO Alert System.

This System would always be on stand by  
(such as fire alarm / C.O. Detectors) and will  
be powered by A.C. / with battery backup.  
When Tornado Sirens go off / <sup>in your vicinity</sup> the entire system  
for your General Area will set the alarm  
off in in your home / office / business.

This would happen Day or Night so that people  
asleep would be alerted and could seek  
shelter. This project could be set up and  
constructed with Civil Defense, Police, Revenue  
whom ever was responsible for the Alert  
Systems of the any given area -

The system would be dual mode - land  
line - phone line / airways - Digital - Analog.

~~Patent Research and Market Research~~
